Your tasks

You are responsible for the technical conception of our IT products. You coordinate with our customers and specialist departments on their requirements and translate these into implementable IT requirements. You question the content of concept proposals and always try to develop the optimal solution through mutual reviews in the team. You provide technical support to the project team in the implementation, testing and acceptance of projects. You provide technical support in discussions with customers/prospects in the context of pre- and post-sales

Your profile

You have successfully completed a degree in computer science, mathematics or natural sciences. You have several years of professional experience in requirements management or IT consulting. You work in a structured manner and have a solution-oriented way of thinking. You understand complex issues and can explain them simply and appropriately to your target group
