About Us

Porsche eBike Performance GmbH develops, produces and markets groundbreaking drive systems at its company location in Ottobrunn near Munich under two brands: compact lightweights from FAZUA for agile e-bikes that create an exceptionally natural driving experience, and in the future also particularly powerful drive systems under the Porsche brand name. FAZUA is a young, ambitious brand that turned the bicycle industry on its head in 2017 with a completely new, innovative drive system for light, agile (and good-looking) e-bikes. Since July 2022, we have been part of Porsche eBike Performance GmbH through the takeover by Porsche AG. Our diverse, open, progressive (and fun) team is looking forward to new, inspiring talents who want to shape the future of e-bike technology with us and establish a new cycling culture.
