Production engineer (m/f/d)

Your daily workout

EGYM is looking for a production engineer (m/f/d) to ensure a smooth production process for our state-of-the-art fitness equipment. Would you like to become part of our production and development team in Munich and successfully take our products and processes to the next level? Then apply now!

Communication & coordination: You are the main contact person both internally for our teams and externally for system suppliers regarding all matters relating to the production and assembly of EGYM Smart devices
Project management: You lead internal production projects for process optimization and point out potential for improvement
Process optimization: You work closely with the development, Product and quality teams work together to continuously improve our devices and production processes
Change management: You carry out product changes from the idea to series readiness, taking various aspects into account
Influencing factors (e.g. assembleability, compatibility, availability and ideal change times)
Analysis and management: You create production forecasts, coordinate orders for feasibility and manage our inventory in the ERP system
SAP Business by Design

Your fitness level

Engineering degree: You have a university degree in production/automation technology, mechanical engineering, mechatronics or comparable
Professional experience: You have at least 5 years of professional experience, preferably in an agile environment and have experience in dealing with suppliers in terms of cost, quality and Supplier management
Technical skills: You have experience in PLM / ERP systems (ideally Arena & SAP Business by Design) as well as CAD & PDM systems (preferably Solidworks)
Willingness to travel: You are willing to travel and have a class B driving license (approx. 10-20% of your weekly working hours)
Communication skills & assertiveness: You are characterized by excellent communication skills in German and English and you can assert yourself in difficult conversations with suppliers

Your training goal for your first 6 months

Process understanding: You develop a deep understanding of our tools and processes, develop and network closely with your colleagues.
Independent support: You independently take on the support of system suppliers and moderate appointments.
Product changes: You are responsible for at least one product change and successfully integrate it into the existing work processes

Our training equipment

Corporate culture: Experience the flair of an international company that values

diversity and cultural exchange
Feedback: Develop yourself through regular feedback to continuously develop yourself and work in a team that values

your ideas
